TEIKOKU Makyokansekito Extract Granules

< Makyokansekito >

| Storage |
|--|
| Store at room temperature in a tight container. [See the "Precaution for handling" section.] |

| | |
|--|-------------|
| Approval No. | (61AM) 3682 |
| Date of listing in the NHI reimbursement price | July 1988 |
| Date of initial marketing in Japan | July 1988 |

| Expiration date |
|--|
| Makyokansekito should be used before the expiration date indicated on the label and the package. |

DESCRIPTION

| | | |
|-------------|---|--|
| Composition | 7.5 g of TEIKOKU Makyokansekito Extract Granules contains 1.22 g of a dried water extract of the following mixed crude drugs. | |
| | JP Ephedra Herb | 4.0 g |
| | JP Apricot Kernel | 4.0 g |
| | JP Glycyrrhiza | 2.0 g |
| | JP Gypsum | 10.0 g (JP: The Japanese Pharmacopoeia) |
| Description | Inactive ingredients | JP Lactose Hydrate JP Microcrystalline Cellulose JP Magnesium Stearate |
| | Dosage form | Granules |
| | Color | Light brown |
| | Smell | Characteristic smell |
| | Taste | Sweet and bitter |
| | ID code | TEIKOKU 55 |

INDICATIONS

Infantile asthma and bronchial asthma

DOSAGE AND ADMINISTRATION

For oral use, the usual adult dosage is 2.5 g of TEIKOKU Makyokansekito Extract Granules three times daily before meals.

The dosage may be adjusted according to the patient's age, body weight, and symptoms.

PRECAUTIONS

1. Careful Administration (Makyokansekito should be administered with care in the following patients.)

- (1) Patients in a period of weakness after disease or with greatly declined constitution [Adverse reactions are likely to occur, and the symptoms may be aggravated.]
- (2) Patients with an extremely weak gastrointestinal tract [Anorexia, epigastric distress, nausea, vomiting, soft feces, diarrhea, etc. may occur.]

- (3) Patients with anorexia, nausea or vomiting [These symptoms may be aggravated.]
 - (4) Patients showing a remarkable tendency of sweating [Excess sweating and/or general weakness may occur.]
 - (5) Patients with cardiovascular disorders including angina pectoris and myocardial infarction, etc. or those with a history of such disorders.
 - (6) Patients with severe hypertension
 - (7) Patients with severe renal dysfunction
 - (8) Patients with dysuria
 - (9) Patients with hyperthyroidism
- [(5)-(9): These disease and symptoms may be aggravated.]

2. Important Precautions

- (1) When this product is used, the patient's "SHO" (constitution/symptoms) should be taken into account. The patient's progress should be carefully monitored, and if no improvement in symptoms/findings is observed, continuous treatment should be avoided.
- (2) Since this product contains Glycyrrhiza, careful attention should be paid to the serum potassium level, blood pressure, etc., and if any abnormality is observed, administration should be discontinued.
- (3) When this product is coadministered with other Kampo-preparations (Japanese traditional herbal medicines), etc., attention should be paid to the duplication of the contained crude drugs.

SHO : The term "SHO" refers to a particular pathological status of a patient evaluated by the Kampo diagnosis, and is patterned according to the patient's constitution, symptoms, etc. Kampo-preparations (Japanese traditional herbal medicines) should be used after confirmation that it is suitable for the identified "SHO" of the patient.

3. Drug Interactions

Precautions for coadministration (Makyokansekito should be administered with care when coadministered with the following drugs.)

| Drugs | Signs, Symptoms, and Treatment | Mechanism and Risk Factors |
|---|---|--|
| Preparations containing Ephedra Herb | Insomnia, excessive sweating, tachycardia, palpitation, general weakness, mental excitation, etc. are likely to occur. In such cases, this product should be administered with care by measures such as reducing the dosage. | An enhancement of the sympathetic nerve-stimulating action has been suggested. |
| Preparations containing ephedrine related compounds | | |
| Monoamine oxidase (MAO) inhibitors | | |
| Thyroid preparations Thyroxine Liothyronine | | |
| Catecholamine preparations Adrenaline Isoprenaline | | |
| Xanthine preparations Theophylline Diprophylline | | |
| Preparations containing Glycyrrhiza | Pseudoaldosteronism is likely to occur. Besides, myopathy is likely to occur as a result of hypokalemia. (Refer to the section "Clinically significant adverse reactions".) | Since glycyrrhizinic acid has an accelerating action on the potassium excretion at the renal tubules, an acceleration of decrease in the serum potassium level has been suggested. |
| Preparations containing glycyrrhizic acid or glycyrrhizinates | | |

4. Adverse Reactions

This product has not been investigated (drug use investigations, etc.) to determine the incidence of adverse reactions. Therefore, the incidence of adverse reactions is not known.

(1) Clinically significant adverse reactions

1) Pseudoaldosteronism: Pseudoaldosteronism such as hypokalemia, increased blood pressure, retention of sodium/body fluid, edema, increased body weight, etc. may occur. The patient should be carefully monitored (measurement of serum potassium level, etc.), and if any abnormality is observed, administration should be discontinued and appropriate measures such as administration of potassium preparations should be taken.

2) Myopathy: Myopathy may occur as a result of hypokalemia. The patient should be carefully monitored, and if any abnormality such as weakness, convulsion/paralysis of limbs, etc. are observed, administration should be discontinued and appropriate measures such as administration of potassium preparations should be taken.

(2) Other adverse reactions

| | Incidence unknown |
|------------------|--|
| Autonomic | Insomnia, Excess sweating, Tachycardia, Palpitation, General weakness, Mental excitation, etc. |
| Gastrointestinal | Anorexia, Epigastric distress, Nausea, Vomiting, Soft feces, Diarrhea, etc. |
| Urinary | Urination disorder, etc. |

5. Use in the Elderly

Because elderly patients often have reduced physiological function, careful supervision and measures such as reducing the dose are recommended.

6. Use during Pregnancy, Delivery or Lactation

The safety of this product in pregnant women has not been established. Therefore, the product should be used in pregnant women, women who may possibly be pregnant only if the expected therapeutic benefits outweigh the possible risks associated with treatment.

7. Pediatric Use

The safety of this product in children has not been established. [Insufficient clinical data.]

PRECAUTIONS FOR HANDLING

1. This product should not be stored in direct rays and should be stored in a cool place with, if possible, little humidity.
2. Since it is hygroscopic property, this product should not be stored in humid places after opening.

PACKAGING

Bottles of 500 g
Boxes of 2.5 g×42 packets
Boxes of 2.5 g×252 packets
